“All STEAMEd Up:
Let's take the pressure out of assessment”

from analogue to digital

“...play is important in countering the implicit threat that occurs when we are in transitional spaces – between worlds, between social classes and in alien educational settings.”
(Sinfield 2019)

Background

- Playful, hands-on workshop, focusing on taking the stress out of assessment in lab settings, accepted for Advance HE Learning & Teaching conference July 2020
- “The thrills and spills of dealing with serial dilutions mixed with the difficult dynamics of group work creates an effervescent environment”
- This session showcases the way the workshop was creatively adapted into a pre-recorded audio-visual presentation for the online conference

Original workshop plan

1. Mock practical laboratory assessment using coloured liquids and plastic containers. Workshop leaders to create interventions within each group to ensure that things do not go to plan!
2. Reflection on and sharing of 'laboratory' experiences using Lego models
3. Group members to offer Lego 'gifts' as responses to one another's stories, adding to the visual narrative

Original workshop aimed to:

- Provide experience of 'unsuccessful' group assessments
- Reduce anxiety through a playful approach
- Foster reflection on own assessment experiences
- Foster empathy and compassion for other learners
- Raise awareness of diverse perspectives on assessment
- Provoke consideration of alternative assessment strategies for diverse learners

Key themes

- Group work and assessments
- Lab-based assessment
- Playful learning
- Compassionate pedagogy
- Inclusion
- Reflection
- Mental health and wellbeing
- Affective learning domain

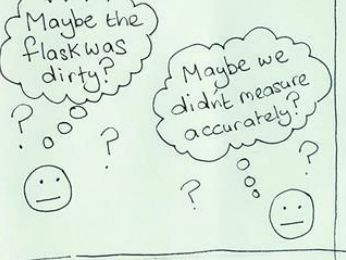

Practical challenges/solutions

- Collaboration:
 - Teams meetings to collaborate on ideas/shared photos & drawings
- Materials:
 - Used online sources including groceries to obtain materials for 'experiments'
 - Used Lego to create 'learners'
- Learning environment:
 - Created 'kitchen sink' experiments
 - Used video of 'experiments' with voice-over from 'learners'

What did we do?

- Storyboarding of workshop activities

<p>All STEAMED up ①</p> <p>Let's take the pressure out of assessment</p> <p>Dmu</p> <p>Photos</p>  <p>Julia Angela Leisa</p>	<p>Difficulties of ②</p> <p>working in groups.....</p> 	<p>Challenges when ③</p> <p>working in a 'wet' lab...</p> 	<p>Dilution task ④</p> <p>and instructions.....</p> <p>Take X Add Y Result ?</p> 
<p>Result ① (Repeat for 2+3)</p> 	<p>Result ① reactions</p> 	<p>Result ① possible causes.....</p> 	<p>Result ① reflections + stories</p> 
<p>Reflections</p> <ul style="list-style-type: none"> • Which learner do you most identify with? • Or do you have a different perspective 	<p>Worksheet</p> <p>Download + print the worksheet for a further reflective activity</p> <p>Share at #.....</p>	<p>Reading + Refs.</p>	

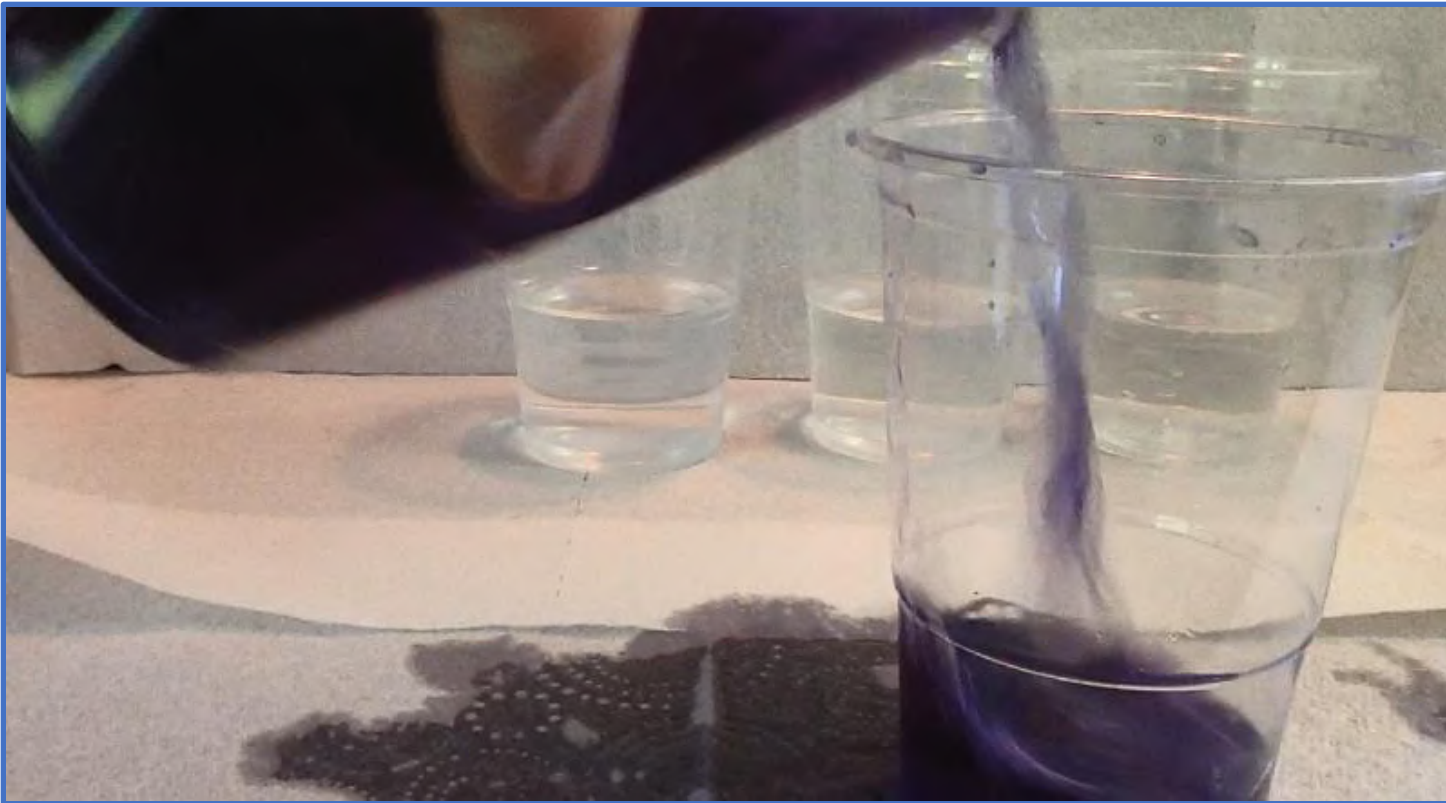

What did we do?

- Created Lego 'learners'

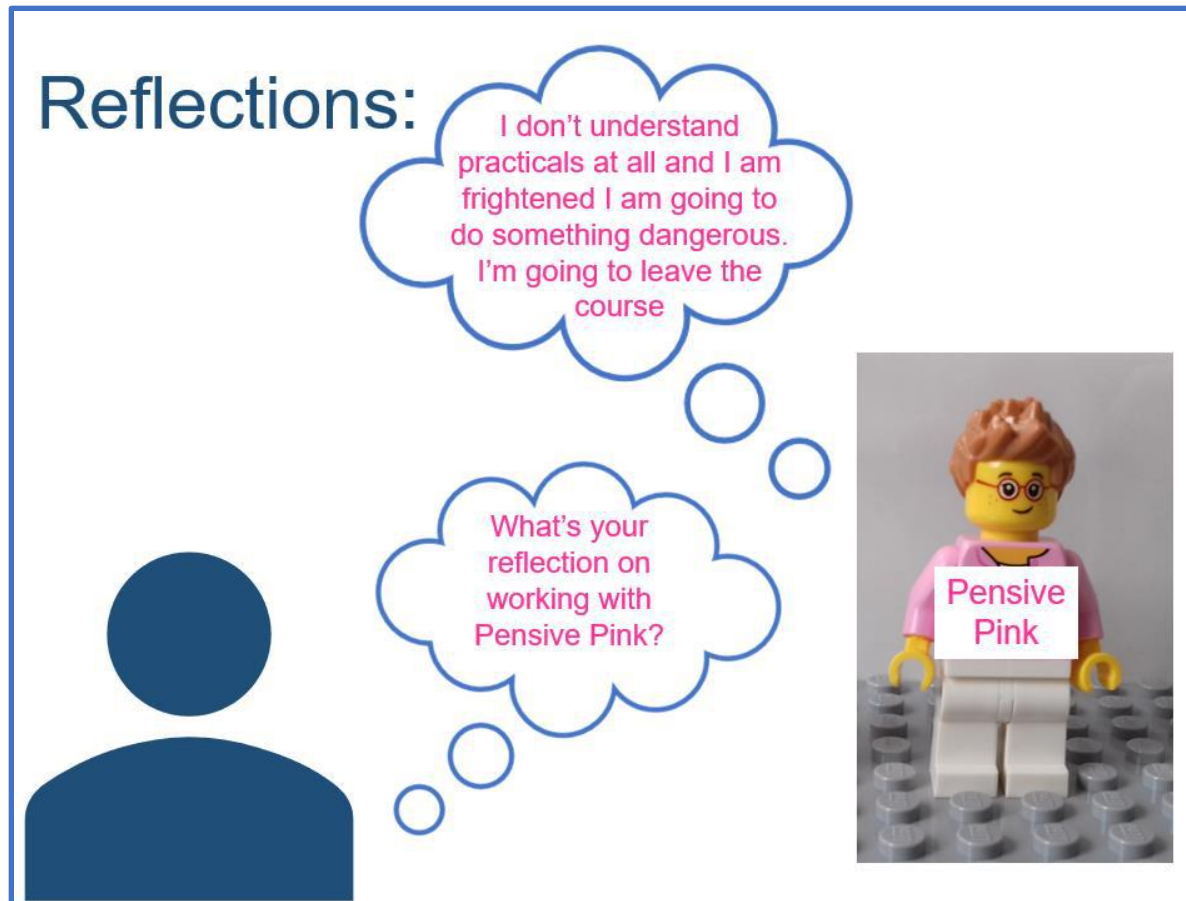

What did we do?

- Filmed 'kitchen sink' experiments

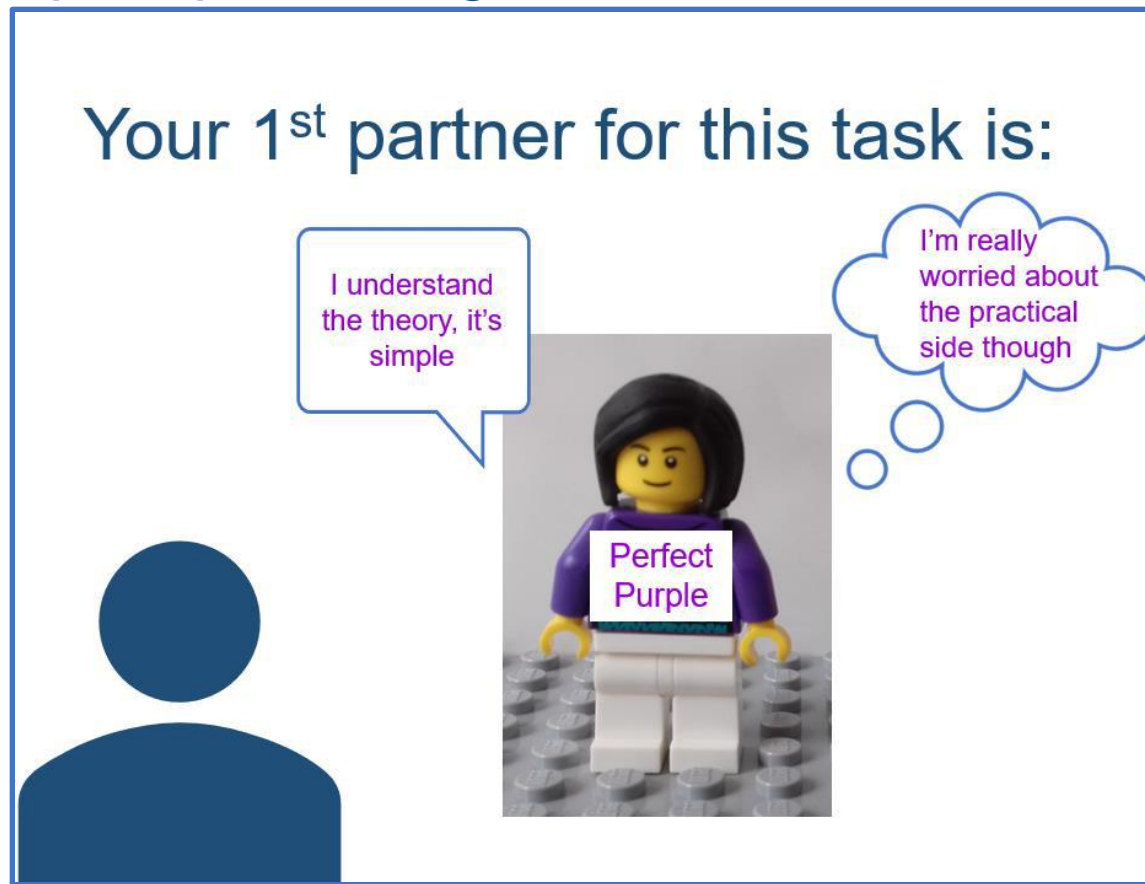

What did we do?

- Used thought and speech bubbles to convey different anxieties and perspectives

How it worked:

- The viewer 'partnered' each learner in turn – the video showed what happened in each assessment – then reflective prompts were given

Workshop aims:

- Reduce anxiety through a playful approach:
- Slide design
- Use of Lego figures – objects with “playful affordances”
- Humorous voice-overs

“*playful* refers more to a mood of frolicsomeness, lightheartedness, and wit.”
(Sutton-Smith 1997)

Workshop aims:

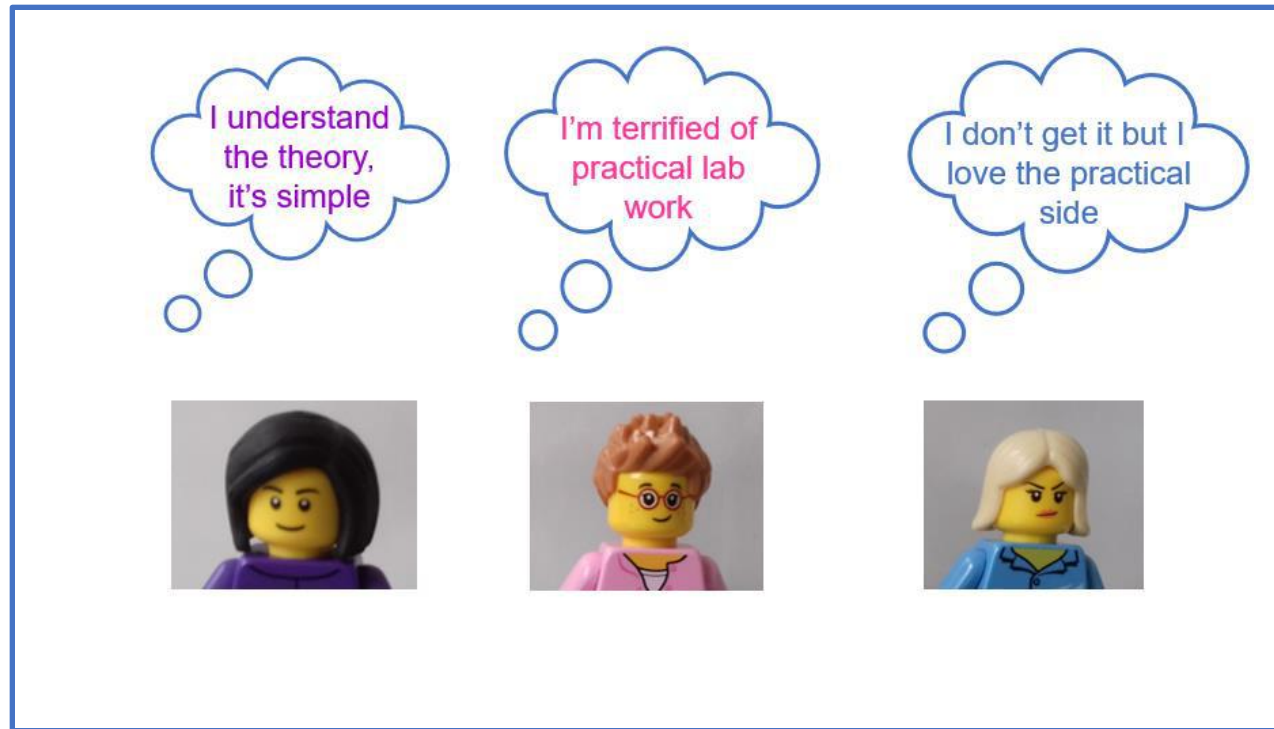

- Provide experience of 'unsuccessful' group assessments

Oops, .. I accidentally knocked the container but it doesn't matter, we can use the results they give us.

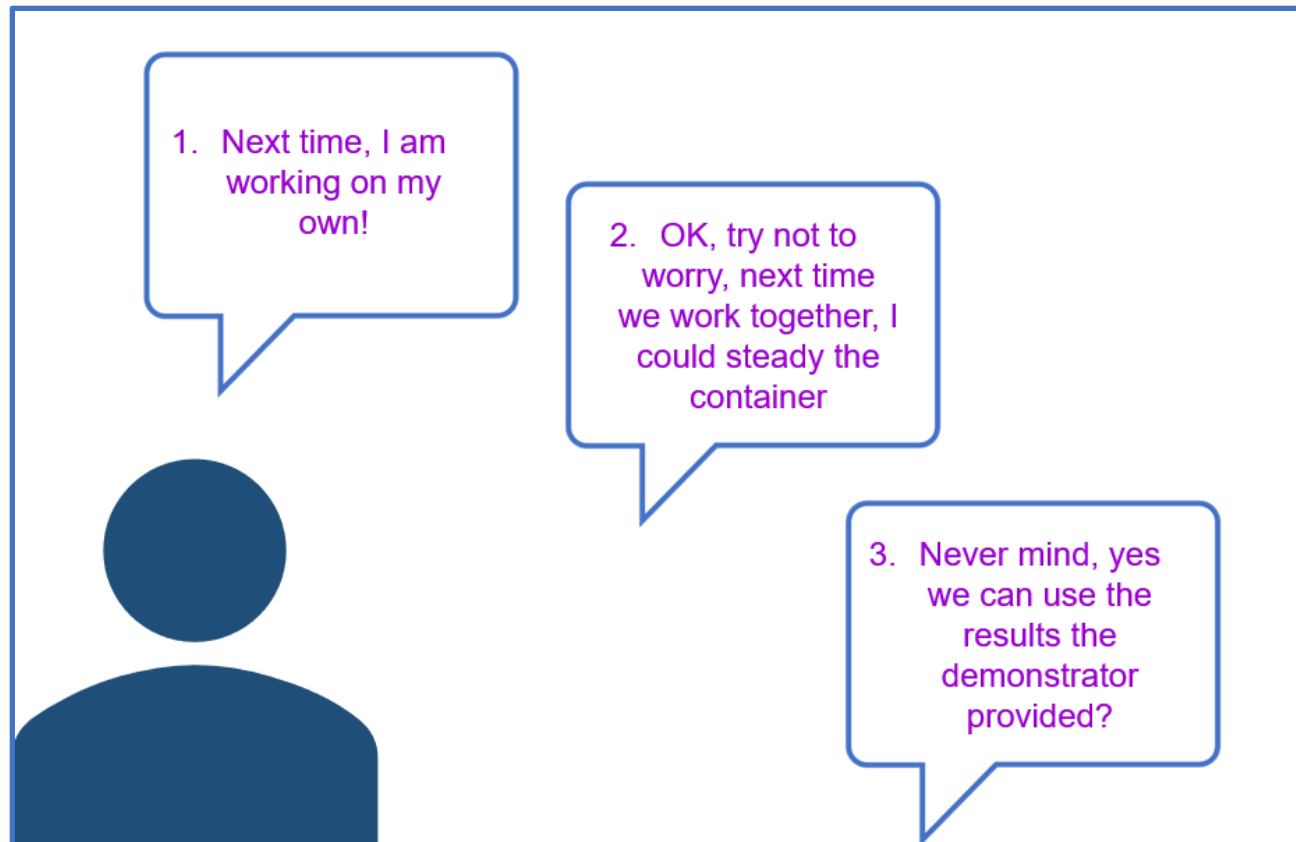

Workshop aims:

- Foster empathy and compassion for other learners

Workshop aims:

- Foster reflection on own assessment experiences

Workshop aims:

- Provoke consideration of alternative assessment strategies for diverse learners

How can we take the pressure out of assessment for these learners?

I wish I could practice more in mocks until I get confident with the practical skills before the assessment. I'm fine with the theory.

Perfect Purple

I wish I had more confidence in the lab theory and practice and that the demonstrator would reassure me that I am working safely. I'd stay on the course then.

Pensive Pink

I wish I could see the point of the practical assessments. If they were earlier in the day my commute would be less stressful. Will they even help me get a job to solve my money problems?

Bothered Blue

Key learning points

- Creative constraints prompted more innovative thinking
- The 'digital pivot' can help to overcome perfectionism
- It's challenging to create the 'human' touch of a playful, face to face workshop in a pre-recorded session
- Premier Pro is really useful in piecing together a mix of video, audio and visuals – but exporting can be tricky!
- This is a 'formula' that is scalable – could be applied to various learner and subject contexts including identity work, UDL and Decolonising DMU
- As a team, we share a playful, inclusive ethos that has the wellbeing of learners at its heart
