

Physician Associate Studies - Multiple Mini Interviews (MMI) information

Congratulations on reaching this stage of the selection process!

We look forward to welcoming you to our Physician Associate online selection event at De Montfort University. We hope you will enjoy your experience and choose to study with us.

We interview our candidates as we want to get to know you, and make sure you have the right skills and values to ensure success on our course, and to become a practicing Physician Associate afterwards.

For our selection process we use a [multiple mini interview \(MMI\)](#), that will take place via MS Teams. This aims to ensure that the Physician Associate profession has the right workforce, with the right skills and with the right values, to support effective team working and deliver excellent patient care.

The assessments will consist of a series of timed activities where candidates complete a task or discuss a relevant topic. These mini interview stations are designed to test the skills required for the Physician Associate course and profession. Each station will last ten minutes and there will be four stations. This system of multiple mini interviews is used nationally and internationally to recruit into many healthcare professions.

After the MMI has taken place you will also receive an invitation to attend a Q&A session on MS Teams, which will allow you to ask any questions you may have about studying the Physician Associate Studies course at DMU.
