TOP 500

COMPANIES IN THE EAST MIDLANDS **2021**

Sponsored by

In association with

FOREWORDS

I am pleased to introduce the second report on The East Midlands Top 500 Companies (EM Top 500) on behalf of De Montfort University.

The EM Top 500 was launched successfully in 2020 and celebrates the business success

of the East Midlands as a region with a strong, diverse and resilient range of firms. They contribute greatly to the economic regeneration and growth of the region. De Montfort University is proud to work with the region's businesses, and to educate future generations of business and community leaders.

After a year and a half that has presented unprecedented challenges for businesses across a whole host of sectors, it's vitally important to take stock and celebrate success.

We're lucky to have so many great businesses on our doorstep, packed with household brands and many others less well-known but who are titans of their industries.

The East Midlands is the engine room of the UK's economy – a manufacturing powerhouse, a hotbed of innovation, and a logistics hub that can put the region at the centre of Britain's post-Brexit global trading relationships. None of this has changed as a result of the pandemic, so it's more crucial than ever to shout about what we've got with a united voice – because we have an amazing story to tell.

The East Midlands Top 500 Businesses Index sets this out in vivid detail, showcasing the huge contribution our region makes to UK Plc and the strength and depth of our business community. It's the second listing of its kind and

The Top 500 team brings together leading researchers from the Business Schools at De Montfort, Derby and Nottingham Trent Universities. We greatly appreciate their contributions, together with the business leadership from East Midlands Chamber, the excellent online coverage through 'Business Live' from Reach plc, and the valued sponsorship from Bradgate Estates Ltd.

Professor Heather McLaughlin

*Pro Vice-Chancellor,
Dean of the Faculty of Business and Law*

while many of the top positions remain stable, it's interesting to observe which companies have climbed the table and those that have fallen.

While eyes will initially doubt be drawn to the high-profile businesses, looking down the list makes it clear that there's a wide variety of smaller companies that make our economy tick. It also demonstrates the strength of the region's supply chain in becoming interconnected, and providing much of the employment, skills and innovation the region builds its reputation on.

Scott Knowles

*Chief Executive,
East Midlands Chamber*

Bradgate Estates Ltd

The East Midlands is a dynamic region, its core encompassing the three county cities of Leicester, Nottingham and Derby. There are internationally recognised Universities producing world-changing research. This results in innovations with commercial

applications which depend on partnerships with public and commercial enterprises to reach their potential markets. The region is home to many successful local and international companies vital to our economic future. Bradgate Estates Ltd and its Abode subsidiaries are a Leicester-based residential property development company. We identify Brownfield sites throughout the East Midlands to develop on behalf of UK and European Pension Property Investment Funds, bringing fresh capital to invest in the region.

For example, Abode is completing a £20 million development in Nottingham's historic Lace Market, providing 130 quality private apartments to rent, working with the local councils, using local suppliers, skilled subcontractors across various disciplines, professionals such as architects and lawyers and local manufacturers. This year Bradgate Estates are sponsoring the East Midlands Top 500 Companies index. Local universities are creating business leaders of tomorrow and this initiative shines a light on some of your region's success stories... 'from little acorns great oak trees can grow'.

This is our way of encouraging inter-regional and company dialogue, and closing the gaps between the region's businesses with our excellent academic sector, local councils, and the East Midlands Chamber of Commerce to enhance the economic prospects for all in the region. I encourage our local companies to host more of our local university and business school graduates to capitalise on the knowledge and skills they can offer.

Anthony Parker.

*Finance Director,
Bradgate Estates*

INTRODUCTION, PURPOSE, HEADLINES

The East Midlands Top 500 Companies index shows the range and strength of the leading businesses in the East Midlands, across the 'Three Counties' of Derbyshire,

Leicestershire and Nottinghamshire areas covered by the East Midlands Chamber.

These businesses are at the heart of the East Midlands economy and are high on the list of those most likely to drive growth and create jobs in the future. Their prosperity affects not only the workforces, supply chains and the communities around them, but ultimately everyone in the region.

The first EM Top 500 was launched in May 2020, and was published whilst the effects of the COVID19 pandemic and lockdown were having a daily impact on all our lives as well as many of the companies featured. The East Midlands Top 500 Companies 2021 appears in a changed economic climate in which the region's businesses have shown great resilience and are responding to the many new challenges and opportunities they face. The EM Top 500 2021, highlights the changes and the businesses which are driving our economy. The Top 20 businesses are announced on Thursday 1 July, when the online Round Table event will focus on the results and what they mean for our region, both now and in the future.

The East Midlands Top 500 2021 is a partnership led by Professor David Rae and Dr Rachel English at De Montfort University, with valued contributions from our researchers Deji Olagboye; Zenas Azuma; and from Alex Charles (University of Derby), Dr Will Rossiter (Nottingham Trent University); East Midlands Chamber; Reach Media; and our sponsor Bradgate Estates Ltd.

Professor David Rae
Editor

METHOD, HOW IS EAST MIDLANDS TOP 500 COMPILED AND WHO IS INCLUDED?

The EM Top 500 index lists private and public limited companies with their registered offices located in Derbyshire, Leicestershire and Nottinghamshire.

It does not include large employers who have their registered offices elsewhere; nor does it include public organisations, mutually owned, co-operatives and Educational Trusts which derive most of their income from Government.

The 2021 index uses historical data from Companies House accounts filed for the period between July 2018 and June 2019. It ranks companies by their annual turnover and also includes the number of employees and the Standard Industrial Classification (SIC) recorded. This is accessed via the FAME database published by Bureau van Dijk. The approach builds on the County-level 'Top 200' indices for each County. Because the index is based on company accounts, it inevitably lags current

company performance by around two years, since companies have up to 9 months after their year-end to file their accounts. The datasets for the county-level indices were compiled first, checked, standardised and then combined into the East Midlands dataset. There are rigorous checks to eliminate duplicates, to remove companies which have become insolvent or in liquidation, and to ensure that groups of companies and subsidiaries are shown accurately.

The gap between the company year-ends and publication of the index means the information is historic rather than current, but it is not 'out of date'. The first EM Top 500 published in 2020 means that comparisons are now possible. The index is becoming a valuable baseline for economic recovery from the pandemic and for assessing the resilience of businesses and the wider economy.

WHO IS IN THE TOP 500? HEADLINE CHANGES FROM 2020

These 500 companies based in the East Midlands region had a combined turnover of:

2021 - £94,365,300,000

compared with

2020 - £92,986,948,000

= 1.48% INCREASE

They employed a total of 455,657 people. This employment reflects national and even international employment by these companies, beyond the East Midlands.

2021 - 455,657

compared with

2020 - 454,682

= 0.22% INCREASE

These represent very modest changes from the previous year, with small increases in turnover and in employment.

However, these small changes mask shifts in the composition of the companies within the index.

New entrants compared with 2020: 55 firms. These are primarily due to companies with increases in turnover which brought them above the threshold, together with changes in corporate structure and registered office moves into the region. This represents an 11% turnover of companies which indicates a healthy level of 'churn' within the index, introducing new firms. 29 of these are

in the 401-500 tier of the index. These include companies to watch in the future for continued growth. This also meant that 55 firms left the index. These departures reflect companies whose turnover declined or grew less than the index, or who became insolvent, dormant or went into administration; acquisitions or sales; and registered office moves out of the region.

The Top 30 businesses 2021

Looking first at the Top 10 businesses in the 2021 table, it is surprising how few changes there are. The top 5 'brand name' firms are unchanged in their places. The biggest changes are that Rolls Royce has moved down from 6th to 17th place, mainly for reasons associated with the corporate structure and reporting locations of its constituent companies. Steris Solutions Ltd has moved down from 10th to 380, again connected with decisions made by its US owner. As a result, Sports Direct (since renamed Fraser Group), Toyota, Eco-Bat, Bloor and Wilkinsons all move up or into the top 10 group. The top 10 consists of retail (4) automotive manufacturing and retail (3), housebuilding (2) and manufacturing (1) companies.

The companies in the 11-30 grouping reflect a much wider range of business activities. Manufacturing businesses are much more evident, including the food sector. Major business service and finance organisation retain high positions, as do a wider range of retailers. The strength of the housebuilding and construction sector remains evident, strengthened by the creation of Miller Homes Group Ltd registered office in Derby. Otherwise, there are few changes.

THE NUMBER 1 BUSINESS: BOOTS UK LTD AND RELATED COMPANIES

For the second year, Boots UK Ltd is the number one company in the East Midlands, based on its turnover of £6.790 million. However, there are several other companies carrying the brand name Boots in the index which report separately to the parent company, Walgreens Boots Alliance, in the United States. Each of these has distinct characteristics which means that separate reporting rather than aggregating into one entity reflects the business structure and is more logical.

The other four companies are: Boots Management Services Ltd; Boots Opticians Professional Services Ltd; The Boots Company Plc; Boots International Ltd. Collectively these four have a turnover of £1,967 million. If they reported as one business they would appear as the 9th largest business in the region. If added to

Boots UK Ltd, the combined turnover would be £8,757 million. Boots Management Services employs the 40,088 staff which includes the workforce of Boots UK Ltd and largely provides human resources and management services to the group. The Boots Opticians Professional Services Ltd is a separate business providing eyecare services and, like the other four, is wholly owned by Walgreen. Previously, the pharmacy and beauty contract manufacturing business on the Boots site in Nottingham also formed part of the business group but was sold to Fareva Group in 2017. This is now the fast-growing BCM Ltd which has moved up from 224 to 79th place, with its own BCM Employment & Management Services Ltd listed separately at number 399.

BUSINESS SECTOR TRENDS

We analysed the 500 firms across 41 business sectors based on Standard Industrial Classification (SIC) coding. This was distilled to a framework of

six aggregated groups of sectors as shown in the table. This compares the picture from the 2020 index with 2021.

Sector	Number of Companies 2020	Number of Companies 2021	Number of Employees 2020 '000s	Number of Employees 2021 '000s	Revenue 2020 £000	Revenue 2021 £000
Manufacturing (Aggregate)	159	158	89,031	98,571	24,261,723	22,980,281
Retail Trade	28	25	150,645	145,411	19,717,179	20,349,090
Motor Vehicle Trade	40	39	31,015	31,549	15,621,878	15,330,740
Construction	35	37	21,046	22,607	10,157,830	10,514,080
Business Support Services	20	23	27,323	28,096	2,527,289	3,896,483
Wholesale Trade	55	51	27,162	14,955	5,446,218	3,873,459
Others	163	167	108,460	114,468	15,254,831	17,421,167
Total	500	500	454,682	455,657	92,986,948	94,365,300

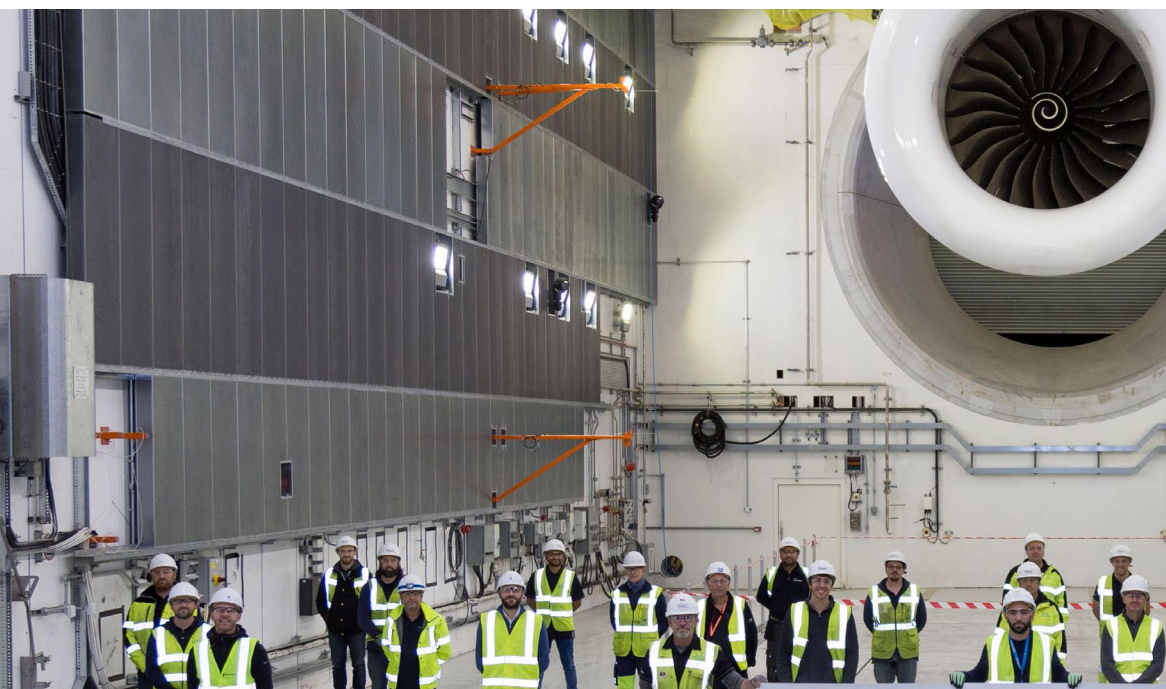

Table 1: Business sectoral analysis

From this analysis, the reduction in manufacturing was just one firm in total, with a growth in employment of 9540 but a reduction in revenues of £1281 million.

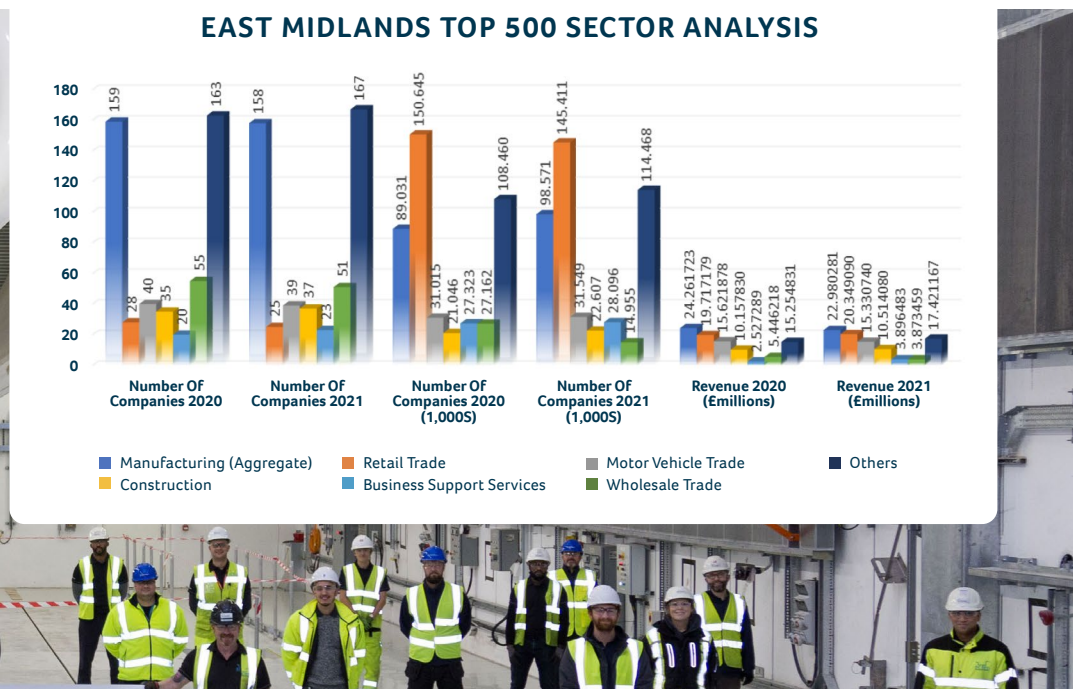

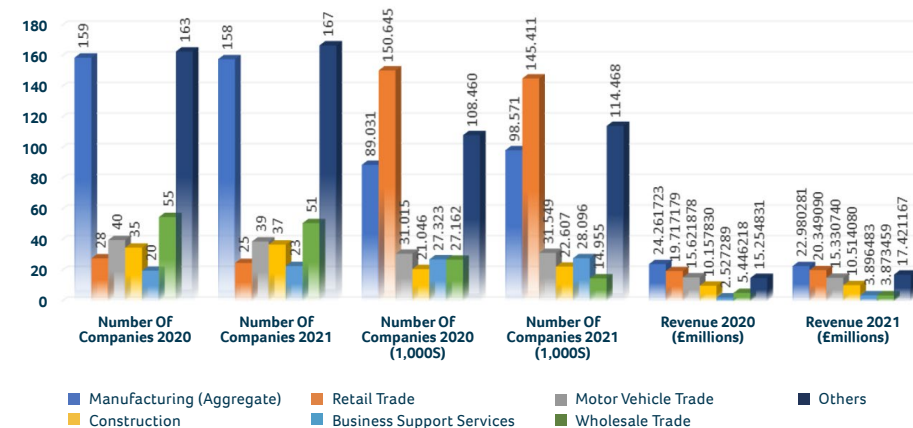

The retail sector decreased in numbers of companies by three and also reduced in employment but revenues increased slightly, with similar decreases in wholesale trade activities, and motor vehicle trade. Construction sector activity increased slightly with two new firms, increased employment and revenues. One of these was Miller Homes, entering the index in 21st place. Business support services increased slightly in numbers of firms and employment, but significantly in revenues by £1.37 million. The inclusion of Boots Management Services Ltd in this sector is responsible for a large part of this increase. This indicates the effects of major

corporate firms on the sector and the economy. The graphs in Figure 1 illustrate the trends in these sectors.

The diversity in the mix of sectors is in many ways a strength of the regional economy. However, the Pandemic has shown that previously healthy sectors, including aviation, travel, hospitality and retail, can encounter either temporary or longer-lasting shocks which have major impacts on their financial performance. Sectors such as housing and most manufacturing subsectors continue to perform well, as do business services. Motor vehicle trade, as well as manufacturing, continues to be a significant sector and it will be interesting to see how quickly this reflects the shift from petrol and diesel to electric power, and the ability of regional businesses to manage this transition.

EAST MIDLANDS TOP 500 SECTOR ANALYSIS

MOVERS & SHAKERS

Businesses to watch

This section identifies the companies which have moved into or climbed furthest up the index. Within this group are businesses which are growing more rapidly than the norm, including some with exceptional strategic ambition and in some cases also demonstrating innovation and leadership. In some cases, a move into or up the index may result from registered office moves into the region and be purely administrative. This also occurs with companies moving out of the region and hence leaving the index. There are also some mergers of previously separate companies, and changes in corporate structure, mainly of large organisations. Within this group, there is a mixture of international businesses locating UK operating companies based in the region. There are also companies in sectors

including manufacturing, healthcare, retail housing and other sectors moving into or up the index. This reflects the diversity of business activities in the region. It includes family-founded businesses in the region which have been growing for several decades and have now entered the Top 500. As the firms included in the EM Top 500 are reviewed annually against the criteria, some firms have been identified which should have appeared in the 2020 index. However, they do not appear as a new entrant this year, and only as a 'mover' if their turnover has increased sufficiently above the norm. Some appeared for the first time but have since been dissolved or do not appear for other reasons. This table includes the new entrants for 2021.

Tier	New entrants placed*	Company	Main Activity
1-100	21	Miller Homes	Housebuilding
101-200	None		
201-300	225	Advent Topco Ltd	Foster care services
	226	Atlantic Projects Company (UK) Ltd	Power engineering
	378	UK Flooring Direct Ltd	Flooring retail
301-400	439	Steetley Dolomite Ltd	Supply dolomitic lime products
401-500	458	Fluorsid British Fluorspar Ltd	Fluorspar mining

*Based on growth not administrative changes such as move of registered office
Table 2: new entrants to the EM Top 100, 2021

TOP NEW ENTRANT: MILLER HOMES

Miller Homes is an established housebuilder which developed from its roots in Scotland to develop a regional UK presence in the North, Midlands and South of England, and has grown consistently over the past 5 years. The new company of Miller Homes Group Holdings acquired Miller Homes Holdings Limited in October 2017 and is

registered in Derby. It has recovered strongly from the Pandemic and acquired a land investment company in May 2021, doubling its future landbank. Miller Homes joins the existing major homebuilders in the region, Barratt, Bloor and Avanti Homes as a significant new presence.

TOP MOVERS

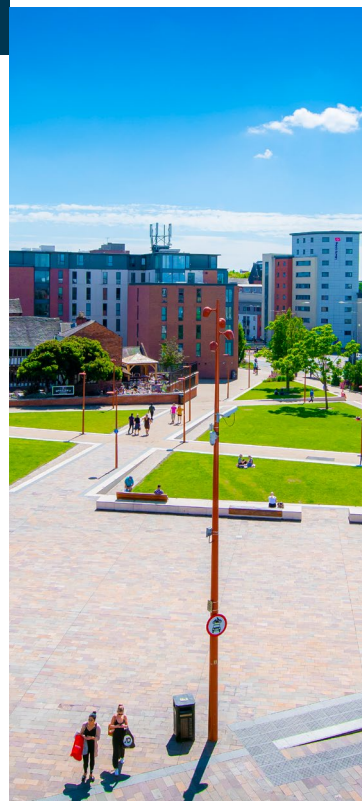

TOP 100

VAILLANT GROUP UK LTD & VAILLANT INDUSTRIAL UK LTD

27 UP FROM 52

Incorporated in November 1934 and August 1972 respectively and operating out of Belper (Derbyshire), Vaillant Group UK Ltd and Vaillant Industrial UK Ltd are subsidiaries of Vaillant Home Productions Ltd, ultimately owned by Vaillant GmbH in Germany. Vaillant is one of the leading manufacturers of heating systems, boilers and heat pumps. The end of 2018 saw their combined

turnover rise to £508 million with a combined workforce growing from 588 to 775. Vaillant recognises that the needs of future customers are trending towards renewable energy products and therefore is investing in the development of provision of high-efficiency appliances and integrated heating system solutions as the way forward.

200-101 **YU GROUP PLC** 165 UP FROM 268

YÜ Group PLC are providers of energy and commercial utility solutions such as gas, water and electricity to corporate customers and SMEs (Small-medium Size enterprises). Since its incorporation in 2016, the company has grown rapidly and now supplies energy to thousands of locations throughout the UK. They supply a large variety of market sectors, including care homes, manufacturing facilities, retail centres, sports stadiums, schools

and offices. Operating from its head office in Nottingham, YÜ Group Plc generated an operating revenue of £80.6 million for 2019, increased from £46.9 million in the previous year. YÜ Group PLC also saw its number of employees grow from 86 to 136. Its future strategy is poised for sustainable growth through innovation, providing multi-utility bundles for customers and decreasing carbon footprint.

400-301 **UK FLOORING DIRECT LTD** 378 - NEW ENTRY

UK Flooring Direct is a family business specialising in own-brand floor retailing, predominantly via online sales. The business was established in 2005 and is based in Hinckley, Leicestershire. UK Flooring Direct had a significant increase in turnover from £23 million to £34 million to March 2019. This resulted from large sales growth to both domestic s and trade customers. Investment in innovative

online technology made the website more competitive and enabled expansion of their product ranges. The business keenly sources its products to achieve competitive pricing. Whilst the business was inevitably affected by the pandemic and lockdown, it attracted BGF investment to fund further expansion, opening an office in China to support procurement and product development.

300-201 **DHP FAMILY LTD** 239 UP FROM 380

DHP Family is the biggest independent music promoter in the UK company entertainment sector, specialising in managing artist, operating music venues, and organising music festivals, concerts and national tours. Incorporated in 1931 and long a family-owned business, the company has been a leader in the live music industry, devising innovative ways of promoting and producing music. Managing venues

in Nottingham, Bristol and London, DHP saw a significant increase in turnover from £31.7 million to peak at £58.3 million in 2018. The growth trend went down in 2019 and the live music was effectively stalled by the pandemic lockdown. However, the outdoor music festival business has restarted in Spring-Summer 2021 and hopes are high for a return to live concert venues reopening.

500-401 **STEETLEY DOLOMITE LTD** 441 - NEW ENTRY

The company's main business activity is manufacturing and distribution of burnt dolomitic lime products for the global steel industry. The business is based in Whitwell, Nottinghamshire. Dolomite had a significant increase in turnover from £24 million to £29 million. This is due to record production through volume growth and supply

chain optimisation. The greater production capacity also allowed the group to optimise its supply chain network. The group policy of using forward markets to manage fuel costs and achieve greater efficiency in the consumption of fuel also contributed to the improved results.

BUSINESS RESILIENCE & RECOVERY

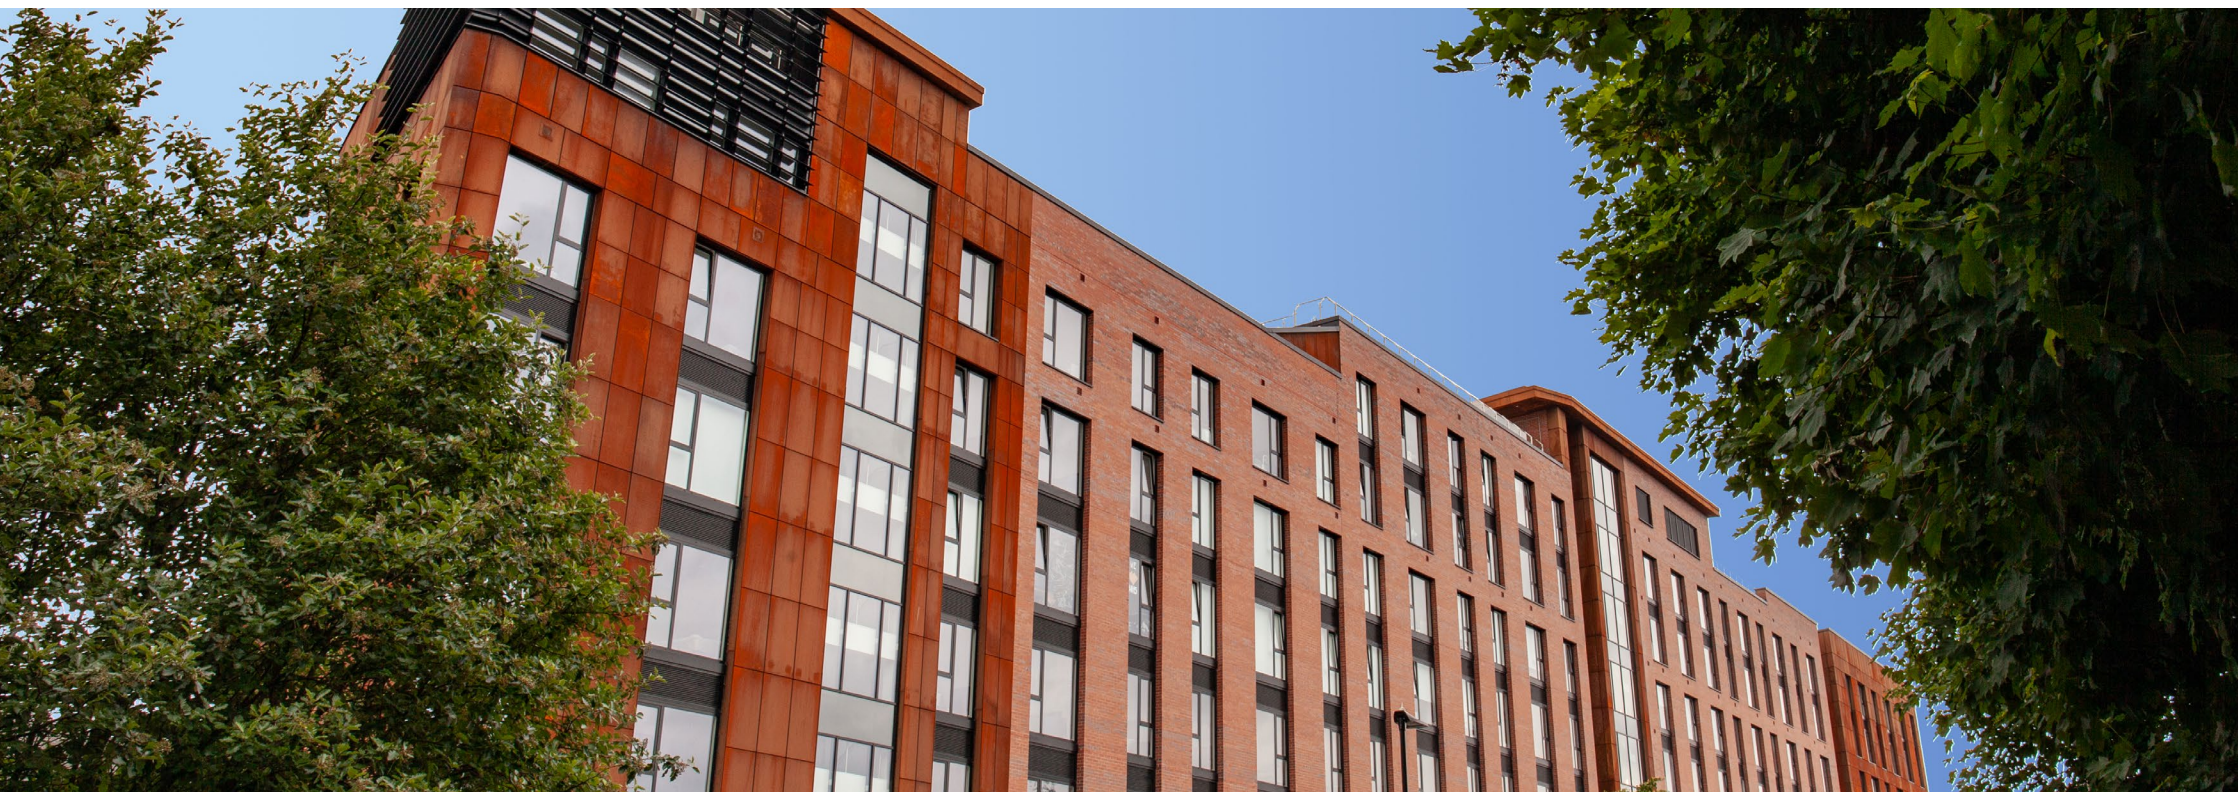

Recent economic data, such as the East Midlands Chamber Quarterly Economic Survey (Q2 2021) shows a sharp recovery in business confidence from 2020.

There are factors which indicate confidence in recovery, such as pickup in demand in areas including construction, food, manufacturing and automotive. However, there are contra-indicators such as a decline in exports to the EU countries (sharply in the case of food and drink products). The full economic effects and business impact of the UK trade deal with the EU are still playing out. Also, there are global supply-chain shortages and price increases in materials such as cement, building materials and

timber. It is too early to say whether these are short-term spikes resulting from a resumption in worldwide demand exceeding limited supply, or whether they will translate to sustained higher prices. There are also constraints in road vehicle-based distribution resulting from a shortage of Heavy Goods Vehicle drivers, and reports of labour and skills scarcities in areas such as warehousing, distribution, food production and hospitality. Reports on UK (as distinct from regional) performance also suggest that national attainment in activities such as entrepreneurship (firm starts), innovation (new products, services and business models), and firm competitiveness have not recovered and are tending to decline.

These do not necessarily reflect the performance of the leading 500 (mainly the largest) businesses in the East Midlands, but they do tend to shape the regional economy and its resilience. Finally, at a fiscal level, the UK, as with other developed countries, has borrowed heavily to finance relief and recover measures from the COVID pandemic, in the form of furlough and other support. These are coming to an end during 2021 but the debt accrued will take time to repay. This is also likely to constrain future UK Government regional expenditure and investment. The East Midlands has suffered from past under-investment by government in areas such as innovation, infrastructure and transport, and it will be important for the region's political

and business representatives to ensure that the region receives proportionate public investment when compared with other regions such as the West Midlands and Northern England. For example, rail investment in electrification and the HS2 Eastern route has been promised, but seems to be long delayed. For these reasons, there has to be caution over the future economic outlook for the East Midlands region. This is likely to provide a challenging environment for future growth, yet the region is also seeing continuing corporate and private business investment, notably in logistics and distribution, and businesses in key sectors are well placed to adapt to new growth opportunities.

QUESTIONS & FUTURE PROSPECTS

Future prospects & questions for Round Table, 1 July

Conclusions

The index for 2020 in some ways reflects an interim year, prior to the effects of both the COVID Pandemic and lockdowns, and of the 2021 Brexit trade deal on the economy.

Next year we shall start to see the effects of the Pandemic in accounts submitted to June 2020. The region's economy, as reflected in the performance of its largest companies, changed relatively little and quite slowly during the year in question.

Overall, it shows rather limited growth, and neither strong dynamism nor decline. The following and current years may well tell a different set of stories; we shall see.

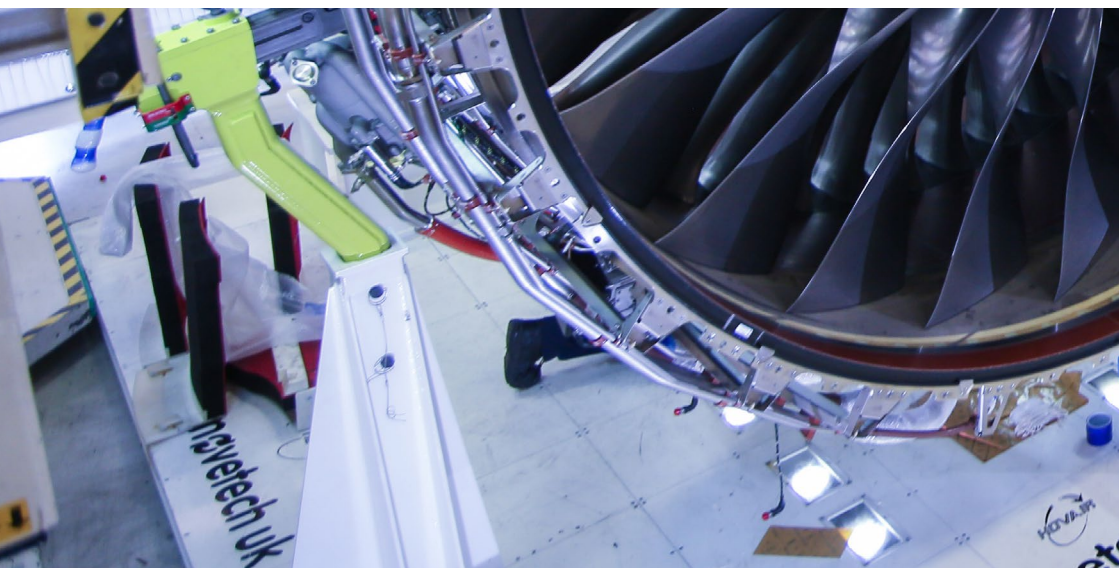

Questions to consider

1. The corporate sector of the East Midlands economy shows limited growth from these 500 companies. Where is future growth likely to come from, such as from smaller firms?

2. How strong is the East Midlands competitiveness, based on these firms, in relation to other UK regions and also other comparable world regions?

3. Are we using the best information to measure company performance? The EM Top 500 index is based on company accounts reporting sales turnover and employment. Factors such as resilience, competitiveness, productivity and environmental performance are increasingly important for firms' future success. Financial measures alone are of limited value in assessing these. Should the EM Top 500 consider indicators other than turnover and employment? If so, what should these be?

4. Contributions to communities by firms, and their commitment to inclusive employment practices and ethical sourcing in their supply chains are increasingly under scrutiny from consumers, media and politically. Should these dimensions also be assessed? If so, from what datasets?

The Round Table panel session for the EM Top 500 2021 on 1 July brings together a group of highly distinguished business leaders and experts within the East Midlands region.

The Round Table panel members are:

Chair: Alistair Houghton
Business Live editor,
Reach Media.

Sara Christie
Fashion and jewellery
entrepreneur. Previously
a Director at NEXT.

John Quigley
Former MD, Sytner BMW
Nottingham (Sytner is no. 2
in the EM Top 500 2021)

Scott Knowles
Chief Executive,
East Midlands Chamber.

Anthony Parker
Financial Director,
Bradgate Estates Ltd,
EM Top 500 2021 sponsor.

Professor David Rae
De Montfort University.
Editor, East Midlands Top 500.

The panel members are used to asking tough and probing questions. They will explore what is going on 'behind the data' in the Top 500 and, more important, what this means for the health of the region's economy, its businesses and communities at this crucial time.

HELP TO GROW

MANAGEMENT

Are you a member of the senior management team at a small or medium-sized business? Do you want to take your leadership skills and your business to the next level? Join other business leaders at Leicester Castle Business School on the new, Government-subsidised, Help to Grow: Management programme.

Accredited by the Small Business Charter, Leicester Castle Business School is offering this 12-week practical programme, which covers all aspects of management, including finance and strategies for growth and innovation, for just £750.

- 90% funded by Government
- For SMEs with 5-249 employees
- 12-week course designed around your work commitments
- 1-1 mentoring to focus on your personal leadership skills
- Access to an alumni programme and growing business network

“The Help To Grow tutors are incredible - they are so knowledgeable and passionate about this subject”

Sam - Nest Gifts
