FACULTY OF HEALTH AND LIFE SCIENCES
POSTGRADUATE RESEARCH

Research in Health and Life Sciences

Research within the Faculty of Health and Life Sciences makes a real difference to people's lives and strives to achieve excellence with impact. Our strength lies in applied, inter-disciplinary research and extensive collaboration with key partners in industry, charities, public sector, professional bodies and community groups.

There are several Research Institutes and Centres within the faculty which undertake a wide range of research. These cover a variety of key research areas, including laboratory based projects, exploration of social care and social sciences, health care practice and models of provision. We welcome applications for Postgraduate Research programmes at MRes, MPhil and PhD level.

Leicester Institute for Pharmaceutical Innovation (LIPI)

Offers research in the following areas:

- Pharmaceutical technologies and nanomedicine
- Chemistry for health and environment
- Applied and molecular microbiology and infection control
- Pharmacy practice and public health
- Forensic science and toxicology
- Pharmacology and neuroscience

Find out more at: dmu.ac.uk/research/centres-institutes/lipi

Institute for Allied Health Sciences Research

Offers research in the following areas:

- Biomedical and environmental health
- Nutrition and metabolic health
- Sickle cell and thalassemia
- Health and wellbeing

Find out more at: dmu.ac.uk/research/centres-institutes/iahsr

Institute for Health, Health Policy and Social Care

Offers research in the following areas:

- Nursing and midwifery
- Mental health and disability
- Dementia care
- Palliative care and older people
- Diversity research in health

Find out more at: dmu.ac.uk/research/centres-institutes/ihhpsc

Institute for Psychological Science

Offers research in the following areas:

- Health psychology
- Cognition and technology
- Social, personality and culture psychology

Find out more at: dmu.ac.uk/research/centres-institutes/ips
